

# SPE WPTS Webmaster Update

[philip.harbidge@pathcontrol.com](mailto:philip.harbidge@pathcontrol.com)

March 8, 2019

1

# ○ Website Upgrade

- Scope of work issued to vendors for pricing GrayMatter Marketing and HD-O
  - New Vendors welcome to contact me for pricing (Robert Wylie)
- Committee to review and agree Vendor Work Proposal Price
- Estimate is 3K USD for website upgrade work and 1k+ USD per year for maintenance
- New request for <https://www.iscwsa.net> and links to allow more company web browsers to link to and download our content

# ○ New Content Added

- Constitution added for review and feedback for voting at main meeting
- [Draft Constitution for comment and voting](#)

## CONSTITUTION CHANGES

The Officers provided edits to our Constitution. The primary goal was to review the jurisdiction section of the document and provide clarity on roles and responsibilities of elected officers.

[Draft constitution for comment and voting.](#)

We request all SPE, WPTS ISCWSA members review it and advise by e-mail or in person at the next meeting where a vote will be held.

## Education Sub-Committee

### Mission Statement:

The Education Sub-Committee is an advisory body dedicated to raising awareness of wellbore positioning practices and challenges within the drilling industry through workshops, webinars, ebooks, public lectures and other media.

### Activities:

Since inception the sub-committee has been involved in organizing SPE Applied Technology Workshops as a method of raising awareness of wellbore positioning issues to the broader industry. The workshop "Collision Avoidance and Wellbore Interceptions – Hits and Misses" was held in Inverness Scotland, Denver Colorado, Istanbul Turkey, and Galveston Texas. The workshop content was expanded to become "Well Placement Best Practice for Increased Value" and presented three times. The first was held in Inverness Scotland followed by Denver Colorado, Istanbul Turkey and Galveston Texas. The workshop content was expanded to become "Well Placement Best Practice for Increasing Value and Reducing Consequence".

The Education sub-committee has editorial control for updates and expansion of the Joint Industry Project e-books "Introduction to Wellbore Positioning" and "Well Intercept". The e-books are living documents, and continue to be developed. The "Introduction to Wellbore Positioning" e-book is being translated into Spanish.

The Education sub-committee cooperated with the University of the Highlands and Islands to develop an on-line competency course based on the Wellbore Positioning e-book.

Over 50 students from 20 countries have already completed the course.

The UHI training website is live. You can watch the promotional video there and see the course details. It is an introduction to the workings of a typical drilling rig and a quick tour of a working rig site.
