Speaker Bio

- Phil HARBIDGE - PathControl, General Manager
- Based in Kuala Lumpur, MALAYSIA
 - MSc. Petroleum Geochemistry, Uni Newcastle Upon Tyne
 - BSc. Geology and Applied Geology Uni Glasgow, UK
- 19 years Active Industry Wellbore Positioning Experience
- Relief & Intercept Well Ranging Interpretation, Wellplacement, Collision Avoidance, Risk Assessment, Well QAQC & Optimization
- SPE, Wellbore Positioning - ISCWSA Webmaster, QAQC Sub-committee Chair,
 - Worked :
 - Civil Engineer Practice, Offshore Marine Surveyor
 - Halliburton, Baker Hughes and Schlumberger Service Companies - PathControl

Project Scope

The scope of this project includes:

1. Consulting with ISCWSA project team members to establish a site strategy and set goals for success
2. Designing a mobile-responsive layout that reflects the organizational message and focuses on the goal of growing/engaging the membership
3. Setting up options for sponsored events with online registration and payment, reminder emails, rosters, and financial reports
4. Developing custom templates for the ISCWSA subcommittees to dynamically display associated site content
5. Building accessible document libraries with selected permissions
6. Migrating content from the existing site as appropriate
7. Establishing an SSO interface with www.spe.org, if needed
8. Testing cross-platform and bringing the new site live on the Tendenci servers
9. Providing up to two hours of training for ISCWSA board members on using the Tendenci software to maintain site content

ISCWSA is responsible for:

1. Designating one point of contact for the project
2. Providing access to the current site for content transfer
3. Supplying additional text and graphics as needed
4. Approving the final site design
5. Participating in site reviews to ensure the project stays on message

Re-cap From ISC#49

- Scope of work issued to vendors for pricing GrayMatter Marketing and HD-O
 - New Vendors welcome to contact me for pricing (Robert Wylie) - **TENDENCI CONTRACTED**
- Committee to review and agree Vendor Work Proposal Price - **DONE**
- Estimate is 3K USD for website upgrade work and 1k+ USD per year for maintenance – **DONE**
Phase I Completed - *Phase II in progress*
- New request for <https://ISCWSA.net> and links to allow more company web browsers to link to and download our content – **DONE**
- *Robert Will Share Estimated Cost ongoing Maintenance Costs*

New Content

- New WELL INTERCEPT SUBCOMMITTEE EBOOK – Correct Version Hosted by UHI, linked to by our website
- All Meetings, Minutes, Presentations, Docs are posted on the new site
- Webinars
- You Tube Videos – Prof. AJ – UHI
- Education Sub-Committee
 - SPE ISCWSA WBPTS Speakers and Workshops
 - SPE Webinars
 - Videos
 - UHI Wellbore Positioning Course and e-books hosted on iscwsa.net Website
 - ISCWSA Committee Review for New Project to Set-Up Course on our site
- SPE.org site is linked to the main ISCWSA.net site

New Content Categorization

- Add Peer Review, Non Peer Review Category Option
- Add Sub Categories Presentations, Minutes, Documents
- Add Tags Anti-Collision; Collision Avoidance; Intercept; Survey Practices; Error Model; Education; Survey Tools; Survey Corrections; Magnetic Models; OWSG; Gyro
- Task assigned to Education Sub-Committee to Assign Cat, Sub Cat and Tags to all docs on website

- Website Stats report not working / moved
- Linked to iscwsa.net site content

CONTACT SEARCH

Find the resources you need for better wellbore survey accuracy.

Industry Steering Committee on Wellbore Survey Accuracy (ISCWSA) produces, maintains, and publishes standards for the industry, promoting a collaborative understanding of issues associated with wellbore surveying.

LEARN MORE

RESOURCE SPOTLIGHT

Introduction to Wellbore Positioning

The advent of the ISCWSA brought in a new era in survey practice, improving the realism of error models and hosting a bi-annual forum for industry experts to share ideas and experiences. This project has emerged out of a recognised need for better educational materials to support the understanding of borehole surveying issues.

[Download the Resource E-BOOK](#)

Well Intercept Subcommittee E-Book

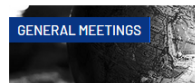

This book helps engineers determine the appropriate ranging methods and technologies for a given positioning objective. Depending on the complexity, there may not be a silver bullet that provides a complete solution. Often, a combination of ranging technologies and methods are required to achieve the desired objectives.

Edit Resource Box 2 Box
[Download the Resource E-BOOK](#)

Error Model Maintenance Subcommittee Error Model Rev4 Excel Workbook

The ISCWSA does not supply, check, certify or warrant the error models created by tool providers. However, the ISCWSA has specified a generic MWD tool error model. It comes in eight variants for various combinations of surveys, platforms, and sag correction.
